

Single Conference Suite

brählerOS; Admin-Tool Component; MicControl

smart Conferencing for **DIGIMIC®**

Article no.: OS.0100 (Single Conference License, unlimited)

brählerOS

Description

The Brähler Conference Operating System (brählerOS) is a sophisticated operating system optimised for conferencing. brählerOS with its individual application components and delegate app provides the ability for all kind of conferences to be maintained cost-effectively over time. Its software architecture is perfectly adapted to the DIGIMIC hardware.

It manages DIGIMIC® conference hardware and smart Conferencing software resources and provides common services for conferences and events.

brählerOS can be thought of as an conference brain, a highly intelligent operating system that manages and controls complex, distributed network resources and functions of your conference applications.

It gives you the possibility to manage all activated software component configurations, such a single or multi PC-, stand-alone or network based installations.

Package includes Admin-Tool Component being the central Administration and Setup and flexible conference control software MicControl.
